LOCAL ENVIRONMENTAL COMPANY ANNOUNCES EXPANSION INTO NEW MARKETS

Kingston, ON – Scott Environmental Group (SEG) Limited is proud to announce the expansion of the company to include new Canadian facilities which will support their existing Emergency Response solutions as well as their new Rail Road Response Services.

Founded and headquartered in Kingston, Ontario, SEG is a leading provider of innovative solutions for environmental, industrial, emergency preparedness and response. SEG partners with clients to support their business activities, delivering comprehensive, cost-effective and safety-driven solutions even under the most challenging conditions. SEG ensures its clients are prepared for all eventualities responding immediately and effectively wherever emergencies occur.

With new facilities opened in Vaughn, Ontario and Red Deer, Alberta in January 2010, SEG is better able to serve their growing market share and increase their response time when environmental emergencies occur. Their physical expansion coincides with the introduction of their new Integrated Emergency Response Rail Road Services. SEG is now able to provide support from simple track clean up, load adjustment and railcar transfers to major train derailment situations.

“This expansion represents our continued growth as a leader in Emergency Response and spill response. Our partnership with trans-national rail providers will secure this market for the next five years,” comments George Scott, President & CEO of Scott Environmental Group.

With currently 125 employees, SEG is presently hiring in both their new locations.

“George Scott and the Scott Environmental Group have been leading the way in innovation and commercialization of emergency environmental services for years. The recent expansion puts a local company on a national scale which once again proves Kingston is a great place to grow business,” says Jeff Garrah, CEO of the Kingston Economic Development Corporation.

SEG is an environmental sustainability organization who creates systems for today and tomorrow that have a positive impact on our environment. By incubating and commercializing unique environmental technologies they develop sound waste management solutions for clients. This mandate generates specialized capabilities to conserve resources and recycle usable resources back into the supply chain.
